Damilare Enoch Oluwaniyi

Problem Solver & Aspiring Cyber Security Professional

Aspiring Cybersecurity Professional and problem solver with growing expertise in both Governance, Risk & Compliance (GRC) and technical aspects of cybersecurity. Passionate about continuous learning, system protection, and leveraging technology to enhance organizational security.
A strong communicator and team player with proven leadership experience as the Public Relations Officer (PRO) for NACOS and community management experience in creative networks.

Training and Certifications

- Google Cyber Security Certificate: Includes Linux, MySQL, and Python hands-on labs.
- Certified in Cybersecurity (CC) – (ISC) ²: Includes knowledge in security principles, network security, access controls, incident response, and security operations.
- Qualys Vulnerability Management (VM) – Foundation: Theoretical foundation in vulnerability management concepts including asset identification, vulnerability assessment, risk prioritization, and remediation processes.
- TryHackMe SOC Level 1 – Hands-on SOC training covering security monitoring, alert triage and reporting, phishing analysis, SIEM/EDR/SOAR fundamentals, network and web attack detection, Windows and Linux security monitoring, malware and threat intelligence analysis, and incident investigation workflows.
- Computer Science Bachelor of Science(B.Sc), University of medical sciences - Ondo State | First Class

Projects:

Privacy Risk Assessment Platform | Python, Streamlit, Tweepy

GitHub: https://github.com/oluwaniyidamilare26-arch/Privacy-Risk-Analyzer

- Developed a multi-platform privacy risk assessment platform to analyze user data from X (Twitter), Facebook, and Instagram for potential privacy and security exposures.
- Built an interactive Streamlit dashboard that evaluates publicly available profile information and uploaded social media data exports.
- Implemented automated detection of exposed personal information, including email addresses, phone numbers, locations, employer details, job titles, and behavioral posting patterns.
- Designed a privacy risk scoring engine that classifies accounts into Low, Medium, and High risk levels and provides actionable recommendations to reduce exposure.
- Integrated the X (Twitter) API using Tweepy to analyze public profiles, tweets, and follower metrics for privacy-related indicators.
- Applied secure development practices by protecting API credentials with environment variables and excluding sensitive data from version control.

Phishing URL Analysis & SOC Escalation Simulation

GitHub: github.com/oluwaniyidamilare26-arch/phishing-url-analysis

• Investigated a suspected phishing URL using threat intelligence and OSINT tools.

• Analyzed domain reputation and malicious indicators using VirusTotal and web analysis techniques.

• Documented findings through two structured reports: an executive-level risk summary and a detailed technical analysis.

• Simulated Tier 1 to Tier 2 SOC alert escalation, demonstrating incident reporting and communication workflows.

Tools: VirusTotal, OSINT, URL analysis

Email Reconnaissance & Tracking Simulation (Defensive Research)

GitHub: github.com/oluwaniyidamilare26-arch/email-recon-simulation

• Demonstrated how phishing emails can be used for reconnaissance through remote image (tracking pixel) techniques.

• Analyzed how email client interactions can expose metadata such as IP address, user-agent, and access timestamps.

• Related findings to real-world threat research and attacker reconnaissance techniques.

• Proposed blue-team mitigation strategies including email client hardening, secure email gateways, and

user awareness training.

• Tools: Email headers, HTTP logs, OSINT, Linux

HTTP vs HTTPS Security Analysis Lab | Python, Django, Wireshark

GitHub: https://github.com/yourusername/http-vs-https-security-lab

- Developed a Django-based authentication application to demonstrate the security differences between HTTP and HTTPS.
- Captured and analyzed network traffic using Wireshark, demonstrating that credentials transmitted over HTTP could be intercepted in plaintext.
- Configured HTTPS using locally trusted TLS certificates generated with mkcert.
- Verified that TLS encryption protected login credentials by preventing sensitive data from being exposed in captured network traffic.
- Documented the methodology, packet analysis, and security findings, highlighting the importance of encrypted web communications.

Professional Experience

Computer Center, Unilag 2021 — 2022

Computer Operator at a computer center in Unilag. Duties include:

- Provided front-desk support by interacting with clients and addressing service inquiries.
- Performed document services including typing, printing, photocopying, and laminating.
- Delivered basic IT troubleshooting and maintenance for computer systems.
- Maintained regular communication with clients to ensure service satisfaction.

Spent Digital Labs March – June 2026

Cybersecurity Analyst Intern at Spent Digital Labs. Duties include:

- Designed implementation roadmaps for secure web applications, emphasizing scalability, maintainability, and cybersecurity best practices.
- Conducted security vulnerability assessments and documented remediation recommendations to strengthen application security.
- Collaborated in the design and development of an OSINT-based fraud detection platform, supporting software implementation, testing, and technical documentation.

- Applied secure software development principles throughout the software development lifecycle (SDLC) to reduce security risks.
- Worked collaboratively with development teams using Git and GitHub for version control and project management.

Mastercard Cybersecurity virtual experience program on Forage September 28, 2026

- Completed a job simulation where I served as an analyst on Mastercard's Security Awareness Team
- Helped identify and report security threats such as phishing
- Analyzed and identified which areas of the business needed more robust security training and implemented training courses and procedures for those teams.

Deloitte Australia Cyber Job Simulation on Forage September 29, 2026

- Completed a job simulation involving reading web activity logs
- Supported a client in a cyber security breach
- Answered questions to identify suspicious user activity

Commonwealth Bank Introduction to Cybersecurity Job Simulation on Forage October 3, 2026

- Completed a job simulation involving the role of a cybersecurity generalist, specializing in fraud detection and prevention for Commonwealth Bank's Cybersecurity team.
- Developed skills in building data visualization dashboards using Splunk to uncover patterns and insights in historical customer data, aiding in fraud detection.
- Demonstrated the ability to respond effectively to cybersecurity incidents, including notifying relevant teams, collecting information, containing and stopping attacks, and aiding in recovery efforts.
- Enhanced security awareness expertise by designing infographics promoting best practices for secure password management, following Australian Cybersecurity Centre advice.
- Acquired practical experience in penetration testing, assessing the security of web applications, identifying vulnerabilities, and providing recommendations for remediation to bolster cybersecurity defenses.

AIG Shields Up: Cybersecurity virtual experience program on Forage October 6, 2026

- Completed a cybersecurity threat analysis simulation for the Cyber Defense Unit, staying updated on CISA publications.
- Researched and understood reported vulnerabilities, showcasing analytical skills in cybersecurity.

- Drafted a clear and concise email to guide teams on vulnerability remediation.
- Utilized Python skills to write a script for ethical hacking, avoiding ransom payments by brute forcing decryption keys.

Tata Cybersecurity Security Analyst Job Simulation on Forage October 9, 2026

- Completed a job simulation involving identity and access management (IAM) for Tata Consultancy Services, collaborating with a Cybersecurity Consulting team.
- Acquired expertise in IAM principles, cybersecurity best practices, and strategic alignment with business objectives.
- Delivered comprehensive documentation and presentations, showcasing the ability to communicate complex technical concepts effectively.

Datacom Cybersecurity Job Simulation on Forage October 12, 2026

- Completed a simulation focused on how Datacom's cybersecurity team helps protect it's clients
- Investigated a cyberattack and produced a comprehensive report documenting findings and outlining key recommendations to improve a client's cybersecurity posture.
- Conducted a comprehensive risk assessment

Leadership Experience:

National Association of Computing Students (NACOS)
Public Relations Officer (Pioneer & Current) – 2 Years

- Served as the pioneer PRO for the departmental organization, establishing communication strategies, contributing to the decision making of the whole NACOS body and outreach initiatives.
- Served two consecutive terms as Public Relations Officer (P.R.O.), having been re-elected in recognition of effective leadership in event promotion, information dissemination, and student engagement.
- Enhanced the organization’s visibility and strengthened collaboration between students and departmental leadership.

Community & Communication Experience:

• Managed online communities, coordinated engagement initiatives, and strengthened communication strategies.
